

VICCS, Inc.
An IT Leader in Business Solutions

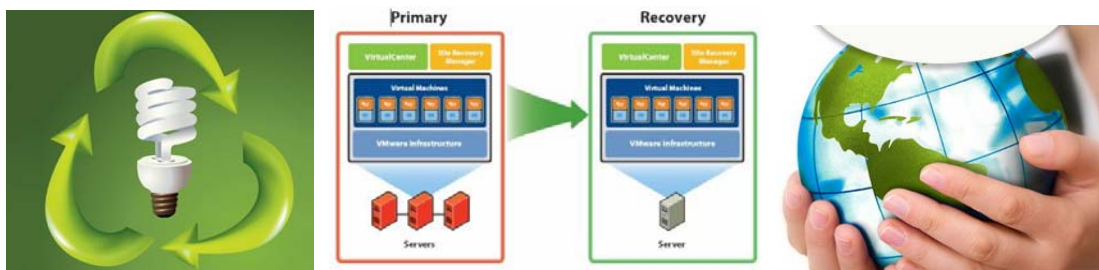

-Presents-

“Business Continuity & Virtualization for the 21st Century”

Business Continuity: Backup, Restore, Recover, Secure & Protect Data

Virtualization: Consolidate, Accelerate & Optimize your IT Power

Going Green: Gov't Rebates & Power Credits & Reduce Carbon Footprints

Do You Have Secure Access? How Are You Retaining & Sharing Business Info? Do You Meet Regulatory Compliance? What Happens If You Lose Critical Data?

Learn Best Practice Business Solutions:

Reduce Spending, Optimize Efficiency, Increase Performance & ROI

- Quickly restore critical business applications should a data crisis or disaster make a surprise appearance
- Protect all of your data applications and ensure business continuity so your systems and data stay available and accessible all the time to meet regulatory compliance.
- Handle your increased Global volume of information by driving a Virtualized Server & Storage environment to run mission-critical applications, while reducing power & energy costs
