

PRESS RELEASE

VICCS, Inc. Enters Commercial Mid-Market with New Products and Services

VICCS to Provide Off-the-Shelf Software for ERP, Content Management, Business Continuity and Virtualization Applications

Rockville, Md. - 15-Oct-08: After 20 years of Global Management Consulting with Public Sector and Large Commercial Businesses, Vertex Information & Computer Consulting Services Corporation (VICCS), today announced the formation of a new mid market division focused on reselling software and providing complimentary services for the ERP, Content Management, and Business Continuity and Virtualization marketplace. The newly formed division of the company will provide software and services from IBM®, Oracle®, EMC®, Microsoft® and other well known companies to mid-market commercial customers.

According to Mr. Robert Weiner, VICCS Director of Sales & Marketing for the new commercial division, "VICCS is expanding its market presence in the mid-market is fueled by a need in security, compliance data management and collaboration. Customer concerns about major issues that face mid size business; such as disaster recovery, necessitate a risk free work environment, compliance, security networks, virtual world sharing and collaboration. VICCS offering will include a full range of software and services for Mid-market companies. These software products and related services are best of breed and will empower companies to store, retrieve, protect, and secure their systems and data".

New Company Direction and Expansion

With the move into these new market segments, VICCS is building on its long time experience and large customer base as premier systems integration and professional consulting services to provide customers with superior off-the-shelf software and services for ERP, Content and Document Management, Business Continuity and Virtualization. In these markets, VICCS will offer the following software packages:

- ERP solutions from IBM - SAP®, Oracle & Microsoft Dynamics
- Content Management Solutions – using Microsoft SharePoint™
- Business Continuity and Disaster Solutions – from IBM and EMC Corporation
- Virtualization – using IBM VMWare® and Microsoft

The software from these leading companies will be sold, supported, and deployed using VICCS Nationwide Professionals IT Consultants and Employees. According to Mr. Kamran Sohelli, Vice President of Technical Services for VICCS, "The entry of VICCS into the commercial mid-market will provide our customers with superior solutions from the leading companies in the target markets. VICCS's expertise in delivering software products and services as total solutions for customers sets VICCS apart as a leading Solutions provider". Sohelli added "In the past, companies turned to VICCS for our industry expertise and our ability to integrate complex problems into everyday business solutions. Now our mid-market customers will be able to purchase software, services and implementation from one vendor to take advantage of VICCS's extensive

VICCS, INC. ENTERS COMMERCIAL MID MARKET WITH NEW PRODUCTS AND SERVICES

experience implementing solutions using off-the-shelf software and services with minimum customization and downtime.

According to Mr. Kamran Sohelli, Vice President of Technical Services for VICCS, "Our company has embraced these offerings and we have quietly built up our capabilities in the target market areas. We are ready with products, services and the people to successfully implement these new products for our customers".

To facilitate and formally announce VICCS's entry into the commercial mid-market, VICCS will hold a series of breakfast and luncheon seminars starting in September, 08 that educate and enlighten organizations on how to take advantage of these cost saving technologies. The first of these seminars will be held at:
